

BLS Workshop:

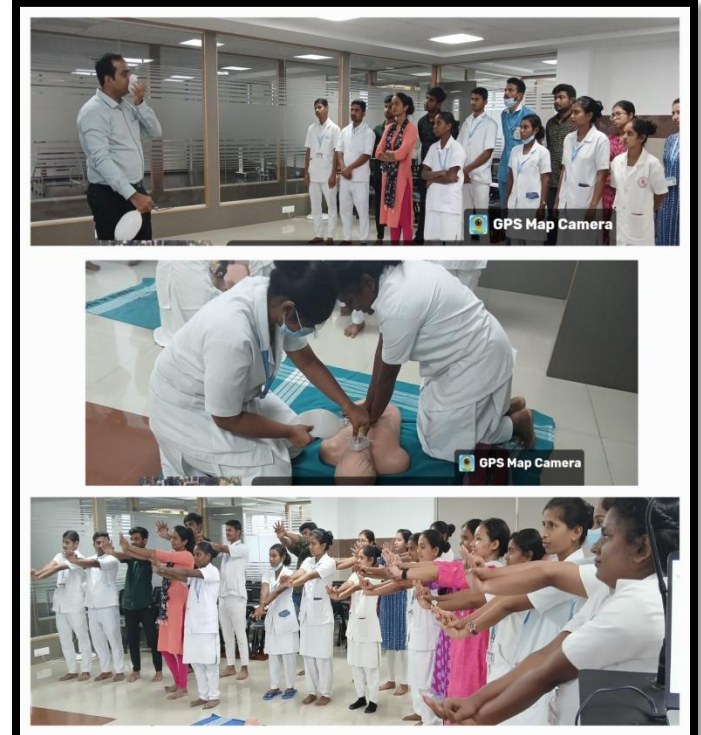

14.08.2024 – Basic Life Support Workshop:

BLS workshop for Hospital Nursing Staff, SIMS&RH was done on 14/08/2024 by SIAMS Skill Lab Committee members in association with Association of Surgeons of India Karnataka State Chapter – Tumkur city branch on occasion of 78th Independence day.

13.01.2025 – Basic Life Support Workshop:

BLS workshop for Hospital Nursing Staff, SIMS&RH was done on 13/01/2025 by SIAMS Skill Lab Committee and HR department in SIAMS Skill Lab.

RGUHS Jeevaraksha ECLS **Course:**

SIMS & RH in collaboration with RGUHS Jeevaraksha offers ECLS course to Interns & PG's to develop competencies like triage scenarios, airway management + choking stations, cardiac / obstetric / psychiatric / emergency scenarios, neonatal resuscitation protocols, trauma care procedures, communication & safe transport scenarios.

ECLS Skill Training:

CPR Station:

CPR and First aid training program helps to acquire skills needed to save lives of adults, children and infants during cardiac emergencies & skills to deal with a wide range of medical emergencies within the community or in the workplace.

PPH / Eclampsia Station:

Training midwives, nurses and physicians to use obstetric emergency drills in their own facilities strengthens teamwork, communication, and practical skills in managing obstetric emergencies.

Trauma Skill Training:

Trauma training aims at providing the essential information and skills that the physicians may then apply to identify and treat life threatening or potentially life threatening injuries.

Airway Management Station:

Airway management skills require application of complex procedural techniques, often under time constraints and clinically critical circumstances. With the development of simulation-based techniques, simulation is playing an important and increased role in airway management training, with demonstrated sustained learning outcomes.

Debriefing Session:

Debriefing is the intentional discussion following the simulation experience that allows participants to gain a clear understanding of their actions and thoughts process to promote learning outcomes and enhance future clinical performance.

Anatamage:

The Anatomage Table is the most technologically advanced 3D anatomy visualization and virtual dissection tool for anatomy and physiology education and is being adopted by many of the world's leading medical schools and institutions.

REPORT

MBBS Skill Training Sessions:

Department of Anaesthesiology **(2024)**
